# WHY DOES MFA MATTER?

What is Multifactor Authentication (MFA)?

The use of two or more authentication factors. MFA is successfully enabled when at least two of these categories of identification are required in order to successfully verify a user's identity *prior* to granting access.

1. SOMETHING YOU KNOW

2. SOMETHING YOU HAVE

3. SOMETHING YOU ARE

Why is MFA critical?

99.9%
of account compromise attacks can be blocked by MFA

94%
of ransomware victims investigated did not use MFA

What should be protected with MFA?

Remote Network Access

Privileged/ Administrative Access

Remote Access to Email

Learn more about how a business can start to implement MFA by contacting your underwriter for more information.
